A member of the Process Materials Group - Malaysia, Indonesia and Australia

INTRODUCTION

Process Materials Australia is part of a specialist engineering, equipment design and supply group operating in South East Asia, Australia and New Zealand. Process Materials Australia utilises the group engineering office - Independent Technology, and can fabricate and commission equipment for the Oil, Gas and Power industries.

- High specification separation of solids from fluids, liquids from liquids and effectively remove solids and liquid aerosols from gas streams.
- Fired equipment packages, design and install, for direct and indirect service.
- Packaged process equipment including cyclones, API separators, metering and fuel systems for liquid and gases.

Management Policy Statement

The Board of Directors is committed to supplying only services and products of the highest quality, ensuring customer satisfaction throughout their effective lifecycle.

It is essential that the Process Materials Group of Companies delivers services and products that are fit for their intended purpose and meet the agreed specifications or contract terms. Our products are designed and manufactured to maintain their position as high-quality offerings in the market, meeting both market demands and customer expectations.

We emphasize competition based on quality and technical performance, with a strict commitment to ensuring that no product or service poses a hazard to the user.

Our Quality Manual outlines procedures to ensure that customer requirements are identified, consistently controlled, and met. Adherence to these procedures is mandatory across all aspects of the Process Materials Group's operations.

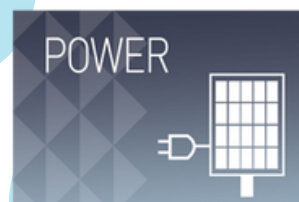

This policy reflects the Board's dedication to quality, recognizing that such efforts are vital for maintaining our long-term reputation, competitive advantage, and achieving both customer and employee satisfaction.

 **PENTAIR OIL & GAS SEPARATIONS****Pentair Oil & Gas Separation Distributor in Australia**

Process Materials is the primary distributor for Pentair Oil & Gas Separation products in Australia, providing reliable access to top-quality solutions for efficient and effective separation.

- ULTISEP** - Gas /Liquid separation
- INTERSEP** - Gas/Particle separation
- PROCESSOR** - Particle Liquid separation
- LIQUISEP** - Liquid/Liquid separation
- HRT** - Hydrocarbon recovery technology

STAR® Testing Program - online Gravimetric Testing, online gas stream contaminant and liquid testing.

Design, fabricate and supply high performance filtration technology supported by Pentair Filtration LLC, Oil & Gas Separation Division.

Filtration & Water Treatment Solutions

Offering a complete range of high-performance filtration and water treatment solutions:

Produced Water Filtration - Efficient systems for safe and compliant operations.

Diesel & Fuel Gas Filtration - Advanced filtration to ensure fuel purity and system integrity.

Scrubbers & Cyclones - Effective particle removal for optimized performance.

Liquid/Gas Coalescers - Reliable separation to improve process quality.

Desalination & RO Packages

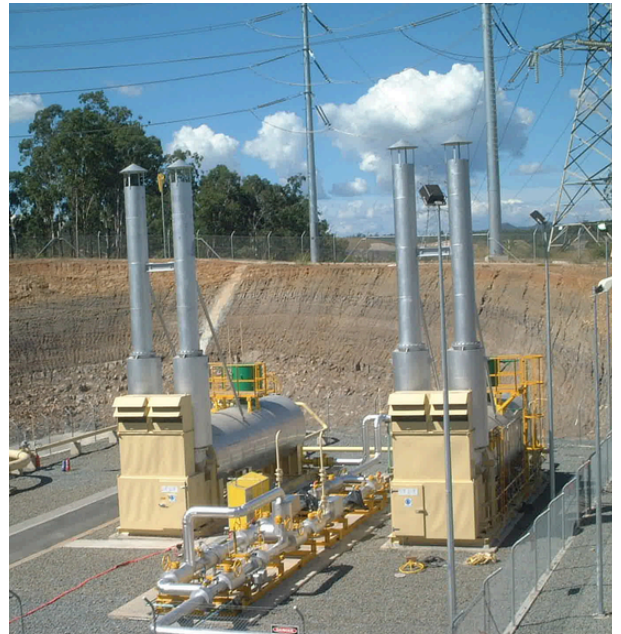

Specialized design and supply of desalination and RO systems for water projects:

Seawater RO - Large-scale desalination for potable water.

Brackish Water RO - Tailored solutions for brackish water treatment.

Achieve reliability, efficiency, and superior quality with our solutions.

Design and fabricate fired heaters, scrubbers and strainers utilising the expertise of Independent Technology Sdn Bhd - a member of the PMG Group

Process Materials Australia ensure clients' needs are met by operating within a certified ISO 9001-2015 management system, with defined courses of action for changes, non-conformance and contract requirements.

Filtration Performance Solutions

We specialize in identifying and resolving filtration issues, ensuring optimal performance through continuous monitoring and maintenance.

Partnering with OEM suppliers, we support reliable filtration performance by offering comprehensive assistance from issue identification to ongoing system monitoring ensuring your filtration systems run efficiently.

Strategic Support for the Australian Market

With strategically located warehouses across Australia, we ensure reliable, timely support and swift delivery to meet your operational needs efficiently.
